DOOR - CUM - PARTITION SECTIONS

The present concept of modular design in office and commercial establishments have offered a wide scope of applications for use of aluminium extruded sections in door and partition. The partitions can be so designed to have wooden panels at the bottom and glass on the top. They can be built on site with very little disturbance to the masonry and being very light, reduce the load on the structure.

CASEMENT WINDOW SECTIONS

Caseament windows (Hinged Type) are simple in design. They are mostly used in residential applications, the windows have hinged panels which open either on the inside or outside. Some windows have additional panels for fixing mosquito mesh, grills etc. These windows can also be made out of hollow shapes which have grooves for weather strips. Extruded glazing clips are used for fixing glass. This will eliminate ugly display of screws.

ONES HINGED AT THE BOTTOM ARE CALLED HOPPERS.) THEY ARE USED SINGLY OR IN PAIRS WITHIN A COMMON FRAME, IN WHICH CASE THEY ARE HINGED ON THE OUTSIDE.
